

R&S®FSH-Z14 Directional Power Sensor

Features

Simultaneous measurement of output power and matching of transmitter system antennas under operating conditions

Directional power measurements from 25 MHz to 1 GHz

Measurement range 30 mW to 300 W

Easy handling

The R&S®FSH-Z14 Directional Power Sensor is to be used with the R&S®FSH handheld spectrum analyzer for simultaneous measurement of forward and reflected power. The R&S®FSH-Z14 offers a frequency range from 25 MHz to 1 GHz and a measurement range from 30 mW to 300 W.
