

# R&S® FSH-Z44 Directional Power Sensor

Features Simultaneous measurement of output power and matching of transmitter system antennas under operating conditions

Directional power measurements from 200 MHz to 1 GHz

Measurement range 30 mW to 120W (300 W with Unmodulated envelope)

Easy handling

The R&S®FSH-Z44 Directional Power Sensor is to be used with the R&S®FSH handheld spectrum analyzer for simultaneous measurement of forward and reflected power. The R&S®FSH-Z44 offers a frequency range from 200 MHz to 4 GHz and a measurement range from 30 mW to 120 W. ( 300W with Unmodulated Envelope)
